3.5	<p align="center">متن زیر را بخوانید و به سوالات داده شده در هر قسمت پاسخ دهید.</p> <p>Sending emails, posting photos, watching online videos, and downloading music seem harmless, but our online habits have a surprising impact on the environment. The impact of our online activities on the environment is called "Internet pollution." This means that, on the one hand, a huge amount of data is processed every day and, on the other hand, more and more devices are connected to the Internet.</p> <p>Processing this amount of data and powering all these devices requires a lot of energy. We use electricity to process data, send it over the Internet, and power our devices. A single message each of us posts on social media may not have a huge impact on the environment, but when billions of people do it every day, it does. Or the energy we need to power one small digital device may not be much, but when billions of them are connected to the Internet, it adds up quickly.</p> <p>The problem, however, is that we are usually not aware of the impact our online life has on the environment. When we post a video or send an email, we do not really think about how much energy goes into it. So, the first step to reducing Internet pollution is to help people understand what their digital footprint is and how it affects the environment.</p> <p>❖ True / False</p> <p>50) The impact of our activities on the environment is called "Internet pollution." a) True b) False</p>	N.

4	<p align="right">متن زیر را بخوانید و به سوالات داده شده در هر قسمت پاسخ دهید.</p> <p>For English teachers, a dictionary is essential for any teaching program and needs to be used carefully. A dictionary is the basic thing for any language class. The most important thing that a student should know is how to use it. A student needs to have at least three dictionaries available to learn English properly.</p> <p>The first one should be a bilingual dictionary that covers words in the native language as well as in English. The second one should be a monolingual dictionary that gives word information in English. The third one should be a native language dictionary. When teaching begins, learners will use a bilingual dictionary for simple translations. Monolingual dictionaries are also necessary pieces of language learning studies, because they provide learners with definitions, pronunciations, etc.</p> <p>The problem becomes hard with studies when the students do not fully understand the words they are translating, and they get confused. Teachers know that they should clear up the confusion quickly before they jump into to the next lesson. When the students enter a more advanced level, they must have a native language dictionary that relates to their own language. When they do not understand the meaning of a translated word in their own native language, they can use this dictionary to figure it out.</p> <p>❖ True / False</p> <p>55- A dictionary is the basic thing for any language class. a) True b) False</p> <p>56- Students must have more than four dictionaries to learn English. a) True b) False</p> <p>❖ Choose the best answer.</p> <p>57-.
