OBJECTIVE

I am eager to apply my language skills and multicultural knowledge in new environments to tackle fresh challenges. Besides following best practices, which I learned in university and professional courses, I enjoy creativity in my work because I see application development as a form of creation, not just a job.

EDUCATION

Payame Noor University

Bachelor's degree, Computer Engineering

Iran University of Science and Technology (IUST)

Master's Degree, Software Engineering (still in process)

PROJECTS

CINEMA TICKET SELLING APP - PYTHON

User can have a roll of admin or customer. Admin adds cinema, scenes, halls, and movies. Customer can buy ticket from available ones with wallet credit.

- modular and microservice driven
- clean code and SOLID principles
- Used MySQL to store data
- SQL alchemy for database-python relation and mapping
- added tests for modules

-

Backend Developer

NAME

SEP 2021 - JAN 2023

TEHRAN - IRAN

+98-

- Built an online dashboard for costumers to track loyalty points, their costumers, usages, etc.
- designed databases and enhanced old database performance by 20%
- used third-party APIs for projects
- Collaborated with the team using Agile methodologies specially scrum method

passions

- I worked for 3 years at Safir Social NGO before it was closed. I created members database using Microsoft Access and recruited members by reactivating social networks
- I enjoy seeing how puzzle pieces come together to form a complete picture, with focus and patience. It challenges my critical thinking skill
- As a cutting-edge technology, cryptocurrency offers many interesting opportunities that I am eager to explore.
