4-Minute Promotional Video — AI-Guardian Network (AGN)

(~ 240 seconds total) – script + scene directions

Style & Tone

- Futuristic / cyber-noir palette (dark backgrounds, neon teals & purples).

- Fast-cut open, steady pace mid-section, triumphant close.

- Underscore: pulsing electronic track (110–120 BPM) that swells at key reveals.

- Motion-graphics overlay key terms; subtle glitch transitions between pain-point shots.

Scene-by-Scene Breakdown

#	Time	Narration (voice-over)	Visuals & Videographer Notes
1	0 – 0:15	"Every click. Every wallet transaction. Someone is watching."	Rapid montage: browser tracker icons, CCTV lens, blockchain explorer scrolling through wallet tx. Quick zoom on IP address & fingerprint hash. Red scan lines.
2	0:15 – 0:30	"Web2 turns you into a product. Web3 turns your wallet into a glass box."	Split-screen: left busy ad-tech dashboard profiling a user; right transparent 3-D wallet cube revealing token flows. Text overlay: *Privacy Crisis.* Short whoosh transition.
3	0:30 – 0:45	"Introducing AI-Guardian Network — the first privacy stack that protects everything you do, everywhere you go."	Logo reveal with neon shield + neural mesh. Sub-tag: *Privacy Empowered by Intelligence.* Slow push-in.

4	0:45 – 1:05	"Step 1: Dynamic Anti-Fingerprinting. Our on-device AI mutates your browser identity in real time, leaving trackers blind."	Macro shot of code morphing UA strings → abstract fingerprint dissolves. Overlay animates rotating canvas hashes.
5	1:05 – 1:25	"Step 2: Guardian Mixnet. Your traffic weaves through encrypted hops, cloaked by cover traffic — faster, stronger, and incentivized."	3-D world map; glowing nodes light up; packets pulse through three hops. Show staking meter filling on nodes.
6	1:25 – 1:45	"Step 3: Federated AI that learns new threats in hours. No logs, no central database — just collective intelligence."	Montage: laptops training locally → encrypted gradients merge into cloud silhouette → global model spins out. Use "matrix rain" turning green on success.
7	1:45 – 2:05	"Step 4: Zero-Knowledge ID. Log in to any DApp with a proof — not a wallet address."	Graphic of user clicking 'Login with AGN'; zk-proof tunnel forms; DApp dashboard opens without wallet pop-up.
8	2:05 – 2:25	"And it all runs on $AGN — a deflationary token that powers bandwidth, rewards node operators, and burns 30 % of every fee."	Circular token flow animation: User → Fee split (burn flame icon, node wallet icon). Bar counter shows supply decreasing.
9	2:25 – 2:45	"Want yields? The CDD staking module turns liquidity into daily rewards — up to 3× principal — while fueling network depth."	Simple infographic: USDT drops into pool ➔ CDD rises ➔ '1 % daily' ticker. Contract card UI lights up.
10	2:45 – 3:15	"What can you do with AGN today?" *beat* "Private DeFi trades, metadata-free chats, enterprise secure gateways, cross-chain anonymity… and counting."	Quick-fire B-roll: trader on DEX, phone chat bubbles with locked icon, office using dashboard, tokens teleporting chain to chain. Text pops beside each clip.
11	3:15 – 3:40	"Built by veterans of cybersecurity, AI, and blockchain. Backed by a global DAO, Genesis and Merit nodes, and an ever-growing community."	Team headshots in floating hexagons; overlay "Genesis Node Auction live" ticker; globe with node pins expanding.
12	3:40 – 4:00	**Call-to-Action** – "Reclaim your data. Protect your identity. Power the privacy backbone of Web3. Join AI-Guardian Network now."	Music peaks. Logo lock-up center; beneath it: website URL, QR code, Discord / X / GitHub icons. Fade-out with faint pulse ripple.

Practical Production Notes

- **Narrator:** warm, authoritative voice (mid-30s). Record in studio; slight reverb for tech feel.

- **On-screen text:** large sans-serif (e.g., Montserrat Bold). Highlight key terms in neon-green.

- **Stock sources:** Shutterstock / Artgrid for security labs, data centers, global maps; Envato for blockchain renders.

- **Custom motion:** use After Effects to animate fingerprint morph, token-burn meter, zk-proof tunnel.

- **Color grade:** teal shadows, magenta highlights; maintain brand consistency.

- **Deliverables:** 4-min 1080p master + 30-sec teaser (cut Scenes 1-4 + 12).
