

High-Purity Chemicals

for Sensitive Analytical Applications

VERNOB offers a focused portfolio of high-purity acids and ultrapure water for laboratory applications where reagent quality and contamination control are essential.

HNO₃ Nitric Acid

For trace elemental analysis and sample preparation.

VB-N-250

HCl Hydrochloric Acid

For trace elemental analysis and selected sample preparation.

VB-C-250

HF Hydrofluoric Acid

For specialized, HF-compatible analytical preparation methods.

VB-F-250

H₂O Ultrapure Water

For sensitive laboratory applications and workflows.

VB-W-1000
