Greetings and politeness

Manufacturer of asphalt plant and spare parts in various capacities, under the license of German comaco with first-class parts.

capacities:

60 tons fixed and 60 tons mobile

80 tons fixed and 80 tons mobile

120 tons fixed

160 tons fixed

200 tons fixed

240 tons fixed

Fully automatic asphalt plant machine in capacities of 60 to 160 tons per hour, with quality in line with European standards (Through cooperation and technology transfer from the German company **COMACO**) Which is currently working in all parts of the country.

Construction, installation and commissioning of more than four hundred and fifteen fully automatic asphalt plants in capacities of 60 to 160 tons, which shows the superior strength and power of this company. Mass production of asphalt plants in capacities of 80 and 120 tons per hour for the Ministry of Roads and Urban Development, Ministry of Jihad Sazandegi, municipalities and private companies (inside and outside the country) shows the desired quality and competitiveness of the company's products with foreign counterparts.

For the first time in the country, this company started to produce a mobile asphalt factory, in which the latest technological advances have been used and an industrial filter has been installed in order to comply with the environmental requirements.

To maintain the existing roads of the country, this company has designed an asphalt stain remover device for the first time and placed it on the production line

This company is the first manufacturer of bag dust collectors (industrial filter or dry filter) for asphalt factories in Iran, which in addition to improving the quality of asphalt factory products has taken a very important step in protecting the environment and preventing environmental waste. It uses a more advanced super bag filter, which is still monopolized by the company in the Middle East and CIS, and is used in the world only by **Steck America** and **German Comaco**.

All the products of this company have a warranty for one year from the time of launching and the service units of this company are always ready to provide services.

In addition to its products, this company has the following capabilities:

1. MC bitumen production equipment
2. Emulsion bitumen production equipment
3. Design and construction of stone crushing lines and its granulation
4. Construction of concrete transmission lines
